**Program Chair for March, Patty Walker** introduced our guest speaker for today. Elizabeth Weng, "Farmgirl" of the Rocky Creek Valley Farm. This is an agricultural and educational center of her creation just north of Rayville MO.

Our guest, we observed, is as a serious gardener who claims not to be an organic farmer but uses many of their principles of organic farming plus many principles of her own creation learned from experience. She has 37 garden spots plus nine raised beds for flowers, herbs and vegetables. She uses no fertilizers. (I don't know what I would do without my triple 13 fertilizer.) Instead she uses worms, manure and compost. She also raises chickens and they assist not just with the egg department but also clean the adult plants of the bugs and creepy, crawly things.

This is what I call a very timely program with most of us chomping at the bits wanting to get out in the garden and get our hands dirty.....

**planting our "maters and taters".**

Thanks for the wonderful, timely program Patty.
